Experience

August 2021 - Now
Product (UI/UX) Designer
www.styledoubler.com

While working closely with technical & engineering team and all stakeholders from business development and partnership development division, i have responsibilities for arranging research, designing user journeys, crafting wireframe + prototype for product interfaces, and maintaining the design system accross all three different product line from partner's mobile apps, client's dashboard, and internal manager's dashboard.

April 2018 - Now
Freelance UI/UX Designer
www.naridha.com

Working with various client on freelance contract (by project) to design the UX and UI for landing page, web apps, and also mobile apps. Beside that i also conduct research and usability testing, assist Front-End Developer while the production on going, provide and ensure quality of all digital assets for the development, and use project management and team communication tools to do collaboration with each project stakeholder.

Sep 2018 - June 2021
Sr. Graphic Designer
www.mandreel.com

At Mandreel, I have responsibilites to create visual assets as the client's request from scratch such as Logo, Brochures/Company Profile, Online Ads, Presentations, Infographics, etc. I also support the creative director with the shaping of the company branding, organize and manage all company's visual assets, ensure quality of all digital and printed materials, and use project management tools to organize and manage tasks.

Sep 2016 - April 2018
Graphic Designer
www.expertcourse.net

My main responsibilites at Expert is to support marketing and oprational divison by crafting visual assets such as Brochures, Online Ads, Presentations, Posters, Banners, Business Cards, Stationeries, etc. I also do the design for internal web pages, support marketing team with ideas through design's stand point, and manage all internal's visual assets.
